SUMMARY

First-year Engineering student with a passion for sustainable design. Eager to apply technical skills in Python and robotics to solve global health challenges through innovation.

EDUCATION

Western University (UWO) <i>B.Eng Undergraduate (General First Year)</i> Received a Western Admission Scholarship for a 90% Top 6 average	London, ON 2025–2030
Victoria Park Collegiate Institute <i>Graduated with the I.B. Diploma and OSSD Diploma</i> - Received Ontario Scholar Award - Graduated with 90% average	Toronto, ON 2021–2025

WORK EXPERIENCE

Camp Counselor <i>The Neighborhood Organization</i> - Worked with children from various backgrounds, including children with mental health conditions such as ADHD and Autism - Collaborated with managers to complete data entry to properly track campers and gather demographic data - Managed camper conflicts and worked to ensure a safe and inclusive environment	Toronto, ON Summer 2025
Community Development Worker <i>The Neighborhood Organization</i> - Prepared comprehensive guides (over 20 free services) for resources available to immigrants in the Oshawa Region for the newly opened TNO branch - Worked together in a small cohort using Microsoft teams for communication and used outlook/calendar to input appointments and log clients when working the front desk.	Toronto, ON Summer 2024

PROJECTS AND EXTRACURRICULARS

Reddit/Yfinance Stock Sentiment Analysis and Prediction Algorithm <i>Developer</i> - Designed a Python-based algorithm using pandas, yfinance and FastAPI to aggregate stock finance data and predict closing price for 5 days. - Trained a RandomForest Algorithm using scikit learn - Designed a Frontend using React js and Tailwindcss and utilized Fastapi for the backend - Github: https://github.com/SrivP/stock_sentiment_analysis	Toronto, ON 2025
Robotics Club VPCI <i>Programmer</i> - Helped program the computer vision portion of our robot, which involved altering pre-provisioned code and fine tuning it to fit our robot's needs (adjusting for the webcam, printing information to the driver hub etc.). - In addition, worked towards programming the claw system, using servos and motors. - Worked in Java	Toronto, ON 2022–2024
Robotic Arm Project <i>Developer</i> - Designed a 6 DOF robot arm, writing code in Arduino (C++) and using websocket technology to interface between computer and ESP32 - Developed a react frontend to help control the robot wirelessly - Github: https://github.com/SrivP/robot-arm-l20	Toronto, ON 2026

TECHNICAL SKILLS

Industry Software: OnShape, Microsoft Office Suite (Excel, Word, Teams, Powerpoint)
Programming Languages: Python (pandas, scikit-learn), Java, SQL, LaTeX, React.js, Tailwindcss, React Native
Tools and Platforms: GitHub, VS Code, Overleaf
